PROFESSIONAL EXPERIENCE (CONTINUED):

UAV Corporation, Fort Mill, SC

Dec 2002 to Oct 2005

Webmaster/Perl Software Engineer – Provided systems support for top ranking national distributor through designing and coding new websites/programs, resolving critical data issues and supervising program maintenance.

- Collaborated with senior management to develop and implement a nationwide interactive website for field service representatives, saving over \$150K annually in operational expenses.
- Joined forces with marketing leadership to design and execute the UAV national corporate website, instantly upgrading sales tools and company orientation for all customers.
- Partnered with audio division to upgrade essential Web-based marketing tools designed to support product lines generating in excess of \$10MM in annual revenues.
- Installed, secured, and managed 10 Linux servers and 5 Windows servers, providing high quality systems support for over 150 end users.
- Originated countless Perl scripts to streamline numerous system administration projects. Created hundreds of Perl applications to manipulate and present end user data upon demand via Internet, Excel, and PDF.
- Located, tested, customized and executed Open Source endeavors throughout the organization, saving thousands in licensing fees and other operational expenses.

Motorola/Verizon Wireless, Charlotte, NC (9 month contract)

Mar 2002 to Nov 2002

Senior Perl Developer/Project Manager, Intranet Portal Development – Devised and implemented an Intranet portal displaying various types of important Verizon data in an effortless end user interface.

- Created MySQL database schema, adding over 200 fields of additional client data. Streamed live records into the database from different sources, accessible via an Intranet search.
- Designed backend Perl programs to collect and utilize real time data from multiple sources. Key functions included streaming MySQL data, detailed statistical analyses, driving graphical representations, archiving critical information and generating routine reports.
- Employed GD::Graph, creating a dynamic CGI to display predetermined data from text reports in useful graphs and charts.
- Configured an Internet based email alert system to notify end user clients when key statistics from routine reports reached set values.
- Consolidated configuration of streamed data, database, routine reports, archiving, graphs and Web-based features into YAML config files.

Deloitte & Touche, LLP, Nashville, TN (Contract expired)

Jul 2000 to Feb 2002

Senior Perl Developer, Broadvision Developer – Implemented an Intranet portal centralizing all global websites to one location, personalizing content to end users.

- Authored Perl scripts to drive critical Dow Jones and other news data to an Oracle database.
- Programmed automated updates to internal organizational websites via end user interfaces.
- Provided various Java Servlets and Perl scripts for related internal portals.
- Setup, configuration and administration of FreeBSD server for other Intranet portals. Deployed customized open source tools for administration.
- Formed multiple scripts to extract statistical data from various custom server logs. Delivered to Portal developers via web interface.

Digital Dog Media, Nashville, TN

Feb 2000 to Jul 2000

E-Commerce Programmer – Created numerous applications for Internet clients successfully utilizing Perl, PHP, ASP, Cold Fusion, JavaScript, DHTML and C++.

- Programmed web interface for interaction with MS Access databases via ASP.
- Delivered web-based dynamic spreadsheets designed to calculate and display end user data inputs, tracking key statistics on a weekly and monthly basis.
- Composed JavaScript and Perl programs to execute specialized features like referral of web pages to alternate end users.
- Developed a security module for proprietary web mailing list manager.
- Deployed several e-commerce sites.

ADDITIONAL RELEVANT EXPERIENCE:

Freelance/Consulting, Various Clients

Sep 1997 to Present

Work on various freelance projects to sharpen my skills as a Perl Developer, Information Architect and Linux Systems Administrator.

- Develop and maintain administrative, personal and ecommerce websites.
- Provide Linux System Administration services.
- Program custom data manipulation scripts.
- Participate in various Open Source projects.
